LAGUNA

INTRODUCTION

In 2018, the government of Curaçao designated the Zakito+ area as a major focus area for economic development.

A vision has been approved which will serve as the framework for all activities conducted at Zakito+. [Download the vision here.](#)

The vision promotes the area's development into a unique, vibrant and unforgettable destination, with a range of both land- and water-based recreational activities for locals and visitors to Curaçao. At the same time, the area offers ample opportunities for the development of residential and lodging accommodations with associated facilities.

Also key is the preservation (and improvement) of the area's current sports and recreational use, as well as its natural assets and tranquility.

The development of Zakito's public space is already underway with the construction and operation of a mangrove park and the implementation of a Quick Win Plan.

A plan is currently being drafted to further improve the public space at Zakito, transforming it into a vibrant and well-visited location. Private initiatives are also being developed in the area.

The government has entrusted the Curaçao Tourist Board with managing and maintaining the Koredor area and its facilities. The Curaçao Tourist Board is seeking qualified tenants with whom to enter into a rental agreement for the building in question.
